

DSCHAN130OLWH

Display Stock 2m Profile 130 Surface White With Opal Diffuser

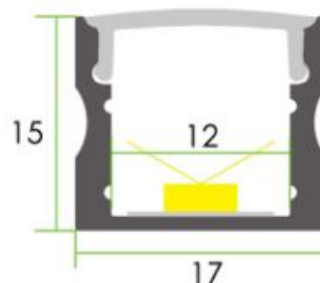

PRODUCT OVERVIEW

DSCHAN130OLWH is a surface mounted profile with a small to medium depth of 15.2mm, offering excellent versatility across a range of applications. Ideal for areas where a slightly deeper profile is required, it delivers a clean, dot-free line of light when paired with the appropriate LED strips. Constructed from 6063 structural grade aluminium, the profile acts as an efficient heat sink to support LED performance and longevity. It is paired with a durable PMMA (acrylic) diffuser, suitable for interior use or exterior installations out of direct sunlight. Installation is simple and efficient, with the option of screw fixing using mounting clips or countersunk screws through the profile base for a secure and professional finish.
