

DSCHANI40FL

Display Stock 2m Profile 140 Recessed Silver With Frosted Diffuser

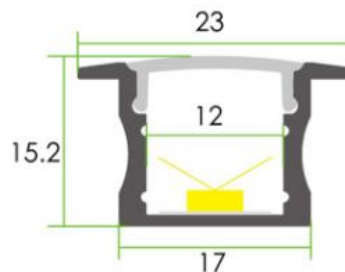

PRODUCT OVERVIEW

DSCHANI40FL is a recessed profile with a depth of 15.2mm, designed for installations requiring a clean, flush finish with a slightly deeper profile. Ideal for joinery and architectural applications, it delivers a smooth, dot-free line of light when paired with the appropriate LED strips. Constructed from 6063 structural grade aluminium, the profile acts as an efficient heat sink to support LED performance and longevity. It is paired with a durable PMMA (acrylic) diffuser, suitable for interior use or exterior installations out of direct sunlight. Installation is simple and efficient by using countersunk screws through the base or it can be glued in place depending on the installation.
