

LC-SPI-TWS-W

Dynamic SPI RGBW/RGBW RF Wall Mount Touch Panel White

PRODUCT OVERVIEW

The TWS is a sleek, modern touch panel controller powered by a CR2032 battery, perfect for controlling RGB and RGBW SPI pixel chasing LED strips. The glass touch interface allows smooth control of colours, effects, direction, speed, and brightness. With an RG 2.4GHz signal this wall panel works well with compatible SPI controllers with RF control.
