

LDRTL700-4W-6V

Led Driver 700mA 4W 3-6VDC IP65 Dimmable

PRODUCT OVERVIEW

The LDRTL700-4W-6V is a compact, IP65 rated constant current LED driver designed for reliable performance in low power lighting applications. Delivering a stable 700mA output across a 3-6V DC range, it supports LED loads up to 4 watts, making it ideal for small format constant current luminaires. Dimmable with both leading edge and trailing edge dimmers, it offers smooth and responsive light control. Featuring flying leads for quick installation and a compact, installer-friendly design, the LDRTL700-4W-6V is well suited for both indoor and exterior environments where durability and performance are essential.
