

LEDCHAN630OL

Large Indirect/Direct Wall Mounted 39.7mm x 83mm Aluminium Profile

PRODUCT OVERVIEW

LEDCHAN630 is a slim linear wall mounted direct/indirect aluminium profile designed to accommodate both high and low output LED strips. LEDCHAN630 is ideal for creating soft indirect wall lighting in architectural spaces. The profile uses a remote driver and supports dimming options for added lighting control. Its two part construction allows for easy installation: the extruded aluminium mounting bracket is first fixed to the wall, the face section is then snapped into place, and the end caps are secured to complete a clean, refined finish.
