

LEDCHAN802OL

Shallow Plaster/Recessed Wall Abutting 38.8mm x 13.6mm Aluminium Profile

PRODUCT OVERVIEW

This Trimless aluminium extrusion is designed for recessed installation into plasterboard edges, creating a clean, seamless line of light with no visible trim. Once plastered, the profile integrates flush with the surrounding surface for a refined architectural finish. Ideal for external corners in both vertical and horizontal applications, it delivers precise edge lighting while maintaining a minimalist appearance, making it well suited to modern residential and commercial interiors.
