

LF-GOE150YV024A

LED Driver Non Dimmable 24V DC 150W IP67

PRODUCT OVERVIEW

LF-GOE150YV024A is a 150W LED driver with a built-in potentiometer. This product was specifically designed for outdoor lighting, high bay lights and flood lighting projects. Super high efficiency and excellent heat-dissipation properties of GOE help to extend the product lifetime. The high-power-factor GOE makes better use of the power grid. Its low harmonic interference means low interference with the power grid and the electric devices in the circuit. All-round protection design improves the product stability which helps to save users' maintenance cost. The potentiometer at the bottom helps to adjust the output voltage/power of the product, satisfying customers various demands. Also suitable for 100-277V input operation resulting in a 20% output de-rating.

PRODUCT INFORMATION

CODE LF-GOE150YV024A	VOLTAGE INPUT 220-277V
VOLTAGE OUTPUT 24V	OUTPUT POWER 150W
AMPS OUTPUT 6.25A	WORKING TEMP -40°C to 60°C
SAFETY AS/NZS61347 EN55015	PROTECTION Overvoltage, Overcurrent, Short circuit, Overtemp
PST = 1	SVM = 0.4
MINIMUM LOAD 25%	POWER FACTOR 0.95
IP RATING 67	EFFICIENCY 93%
DC RIPPLE <10%	

DIMENSIONS

75/100/150W

L169.4mm x W61mm x H34mm
