

LF-GOE200YV012A

LED Driver Non Dimmable 12V DC 200W IP67

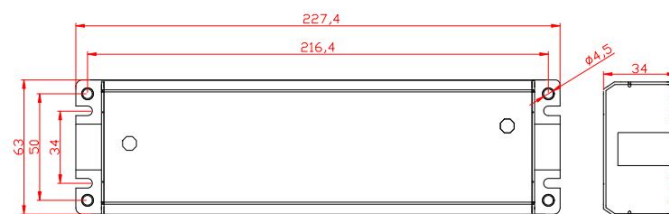

PRODUCT OVERVIEW

LF-GOE200YV012A is a 200W LED driver with a built-in potentiometer. This product was specifically designed for outdoor lighting, high bay lights and flood lighting projects. Super high efficiency and excellent heat-dissipation properties of GOE help to extend the product lifetime. The high-power-factor GOE makes better use of the power grid. Its low harmonic interference means low interference with the power grid and the electric devices in the circuit. All-round protection design improves the product stability which helps to save users' maintenance cost. The potentiometer at the bottom helps to adjust the output voltage/power of the product, satisfying customers various demands. Also suitable for 100-277V input operation resulting in a 20% output de-rating.

PRODUCT INFORMATION

CODE	VOLTAGE INPUT
LF-GOE200YV012A	220-277V
VOLTAGE OUTPUT	OUTPUT POWER
12V	200W
AMPS OUTPUT	WORKING TEMP
16.67A	-40°C to 60°C
SAFETY	PROTECTION
AS/NZS61347 EN55015	Overvoltage, Overcurrent, Short circuit, Overtemp
PST	SVM
= 1	= 0.4
MINIMUM LOAD	POWER FACTOR
25%	0.9
IP RATING	EFFICIENCY
67	89%
DC RIPPLE	
<10%	

DIMENSIONS

200/250W

L227.4mm x W63mm x H34mm
