LED Driver Non Dimmable 24V DC 250W IP67

## PRODUCT OVERVIEW

LF-GOE250YV024A is a 250W LED driver with a built-in potentiometer. This product was specifically designed for outdoor lighting, high bay lights and flood lighting projects. Super high efficiency and excellent heat-dissipation properties of GOE help to extend the product lifetime. The high-power-factor GOE makes better use of the power grid. Its low harmonic interference means low interference with the power grid and the electric devices in the circuit. All-round protection design improves the product stability which helps to save users' maintenance cost. The potentiometer at the bottom helps to adjust the output voltage/power of the product, satisfying customers various demands. Also suitable for 100-277V input operation resulting in a 20% output de-rating.
