

TL-ROLLER-W

6-10mm Wooden LED Installation Roller

PRODUCT OVERVIEW

Designed specifically for COB LED strip installations, this wooden installation roller allows smooth, even pressure to be applied without marking or damaging the continuous phosphor surface. Ideal for pressing COB strip securely into aluminium profiles and mounting surfaces, it helps achieve a clean, professional finish while reducing the risk of installation damage. The ergonomic wooden construction offers comfortable handling and precise control, making installations faster, easier, and more consistent across every project.
