

LCDM600

Single Colour Strip Controller Set

Features

- Mini style dimmer with single channel constant voltage output
- Smooth dimming and switching without any flickering
- 2.4GHz wireless technology, remote distance up to 30m with no obstructions
- Auto-transmitting function, one receiver can transmit the signal from the remote to another receiver within 15m. The remote control distance can be beyond 100m
- Can connect with external push switch to achieve on/off and dimming function
- Compatible with data repeaters to expand the output

Technical Parameter

LED Remote

- Output signal: RF(2.4GHz)
- Working voltage : 3VDC(CR2032)
- Standby time: 1 year
- Remote distance: 30m unobstructed
- Size: L107×W58.5×H9mm

LED Receiver

- Input voltage: 5-36VDC
- Output power: 12V Max 96W, 24V Max 192W
- Output current: 1CH, 8A/CH
- Size: L97×W33×H18mm

Dimension

Remote Function

On/Off: Turn on/off light

Bright wheel: Touch to change brightness

Bright+/-: To adjust brightness, short press 10 levels, long press for 1-5s

100%, 75%, 50%, 25%: Built in with 4 levels of brightness

3 Scene: Brightness memory, short press recall the scene, long press 2s to save the current brightness into the scene

Match Guide

Use Match key

1. Match: Short press the match key on the receiver, within 5s, press on/off key of the remote
2. Delete: Long press the match key on the receiver for 5s, to delete on matched remote

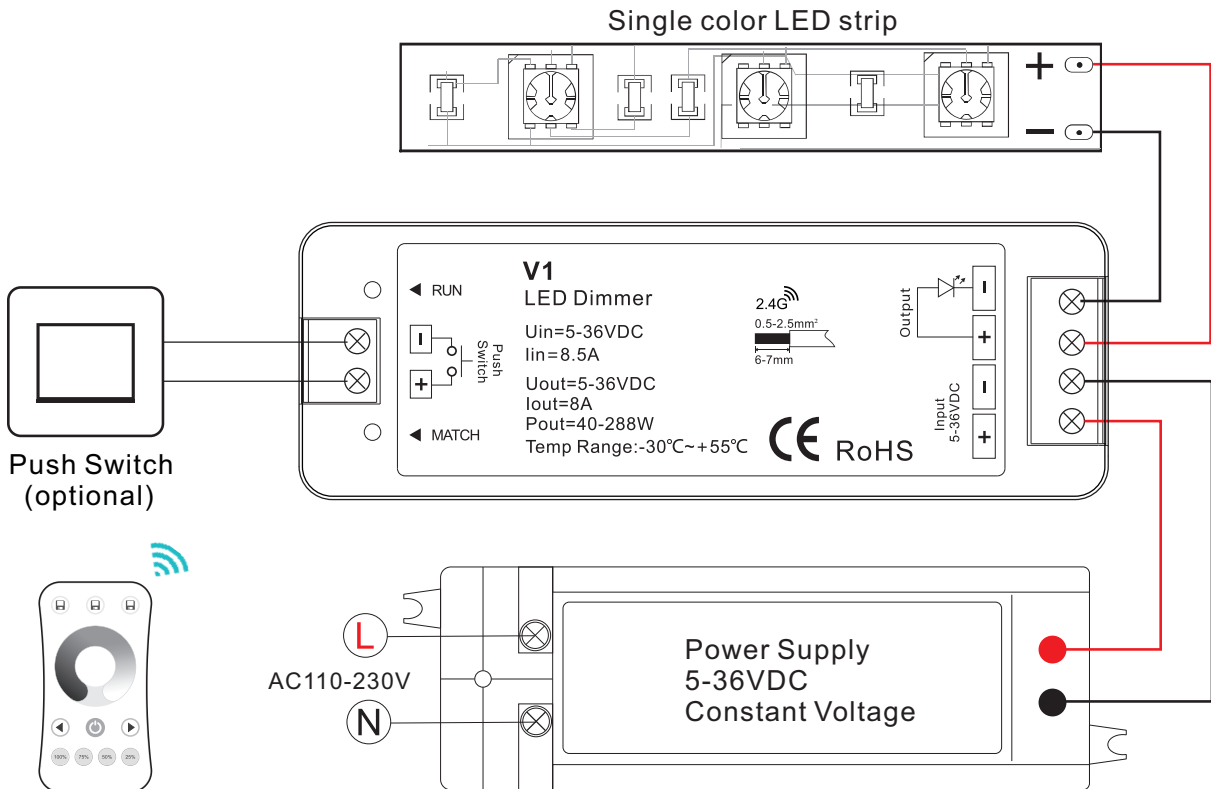

Use Power-up

1. Match: Switch off the power, then switch on again, short press the on/off key 3 times on the remote quickly within 5s after the power is on, the link is done once the light blinks 3 times
2. Delete: Switch off the power, then switch on power again, short press on/off key 5 times on the remote quickly within 5s after the power is on, the unlink is done once the light blinks 5 times

External Push Switch (optional)

1. Short press: Turn on/off light
2. Long press(1-5s): When the light is on, increase or decrease brightness continuously
3. Long press(10s): When multiple controllers share a on/off key, this can achieve simultaneous adjustment

Wiring Diagram

LED power supply voltage and power select:

- 5V lamp, Input 5V power supply, can load 0-40W,
- 12V lamp, Input 12V power supply, can load 0-96W,
- 24V lamp, Input 24V power supply, can load 0-192W,
- 36V lamp, Input 36V power supply, can load 0-288W,
The power supply power must larger than load power 20%.

Malfunction Analysis and Troubleshooting

Malfunctions	Causes	Troubleshooting
No light	<ol style="list-style-type: none">1. No power.2. Wrong connection or insecure.	<ol style="list-style-type: none">1. Check the power.2. Check the connection
Uneven intensity between front and rear, with voltage drop	<ol style="list-style-type: none">1. Output cable is too long.2. Wire diameter is too small.3. Overload beyond power supply capability.4. Overload beyond controller capability.	<ol style="list-style-type: none">1. Reduce cable or loop supply.2. Change wider wire.3. Replace higher power supply.4. Add power repeater.
No response from the remote	<ol style="list-style-type: none">1. The battery has no power.2. Beyond controllable distance.3. The controller did not match the remote.	<ol style="list-style-type: none">1. Replace battery.2. Reduce remote distance.3. Re-match the remote.

Safety Information

1. The product shall be installed and serviced by a qualified person.
2. The product is non-waterproof. Please avoid the sun and rain.
3. Good heat dissipation will prolong the working life of the controller. Please ensure good ventilation.
4. Please check if the output voltage of any power supplies used comply with the working voltage of the product.
5. Ensure all wire connections and polarities are correct and secure before applying power to avoid any damages to the LED lights.
6. If a fault occurs please return the product to your supplier. Do not attempt to fix this product by yourself.
